## BIZOL PRICE ADJUSTMENT

Several competitors have already announced their plans to increase their selling prices by an average of 8-10 %. Some of them have already implemented their price increase.

Unfortunately, we are not able to influence the developments on the commodities market and are therefore forced to adjust our prices.

However, we have decided to pass on only a part of the additional costs to our clients. As a result our price increase has remained relatively small – only 3.5%.

Please consider it as our contribution to bringing forward our customers even further in their respective markets.

### **BIZOL LOW SAPS OILS**

In order to meet current market and customer requirements we are going to launch a number of Low SAPS oils with the most important approvals.

The plan for the time being is to launch two products for passenger cars and commercial vehicles.

We look forward to presenting further details in our next newsletter!

### **BIZOL VISIT TO TUNISIA**

We congratulate our Tunisian partner on the successful BIZOL launch!

Thanks to professional Marketing activities and a very dedicated management our high quality products have been received exceptionally well by the end users.

We thank our partner COCEA - Comptoir Commercial Équipements Automobiles for the great start in Tunisia.
